-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. The drawing figures are objected to because in the specification para. [00016], line 3, describes a second axial end "56", while the same line also describes a height "56". Applicants are reminded that only like elements can have the same reference designation. Thus, one of those numbers "56" must be changed.

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 1 is indefinite because in lines 10 and 11, there is no direct antecedent basis for the recitation of "said sheet retaining carbon granules". Claim 2 is indefinite because in line 3, there is no direct antecedent basis for the recitations of "said axial direction" and "said lateral direction". Claim 4 is indefinite because in line 3, there is no direct antecedent basis for the recitation of "said support frame". Claim 6 is indefinite because in lines 11 and 12, there is no direct antecedent basis for the recitation of "said sheet retaining carbon granules". Claims 3, 5 and 7 are indefinite because they depend from the above indefinite claims.

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 1724

5. Claims 1-5 and 8-10 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by the disclosure of Goto et al. (2001/0032545), wherein the filter element includes an integrally formed frame and gasket member, and activated carbon material in combination with a filter or holding material.
6. Claims 6 and 7 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by the manufacturing device of JP 63-287521, particularly as shown in the figures of drawing.
7. The remaining references listed on both the PTO-1449 and the PTO-892 show art of interest.
8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert H. Spitzer whose telephone number is (571) 272-1167. The examiner can normally be reached on Monday-Thursday from (5:30AM-4:00PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Duane Smith can be reached on (571) 272-1166. The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300.
